

FIVE FUNNY WEATHERS

BY WILLIAM NIU

THE SUNNY DAY

The sun is bright as it shines its light. It shines that makes you hot. It shines that you may want to go to the beach. A beach is a perfect place for the hot and shiny summer. You can make splashes in the sea that makes you cool. You can set up a tent and lay down in the shadow.

THE RAINY DAY

It makes sound. It drips. It makes you become all wet. It makes the day become dark. It is called a rainy day. Some people like it. Some people don't. People that like it may be children. They love to play in the puddle that is fills with water. People that hate rain because they can't do anything but stay at home would be too dark.

THE CLOUDY DAY

It blocks. It warns. It flows. It is called a cloudy day. It blocks the sun from its light. It warns that a rain or a storm may come. It flows to rain or snow in different places. It drops and then it moves. It is like a messenger boy delivering rains and snows.

THE SNOWY DAY

It drops. It flows. It makes the day white and cold. It makes the planes stop flying. It makes the road slippery. It is called a snowy day. It drops on the ground as it flows down from the thick white clouds. It keeps on flowing down until the whole road is covered with white. It makes the day grow cold as the temperature gets down. The planes stopped because there could be a road slide.

THE TORNADO

It makes loud sound. It makes you cover you ears. It makes you lose your house. It makes you turn around and around. It is a tornado. It does a lot of damage in a little bit of time. It makes loud noise that makes you scared and frozen. It turns around and around until you are dizzy. It destroys houses and buildings.
